Do you favor legalizing marijuana for non-medical personal use in Delaware?

✓ **Support**

Explanation: “I use alcohol and tobacco as an example. No matter what we have done in the past to prohibit alcohol or to limit tobacco use, people still use these substances. Because we have made them legal, we now tax alcohol and tobacco and use the revenue generated to help people as well as fund the resources to monitor their use as well as handle their misuse. The efforts to keep marijuana out of the hands of people has not been successful. While I am not condoning it’s use, it is my thought that if we are able to legalize it and tax it, we will now have revenue from it that could be used in a positive way. Right now, no income is generated from the current use of marijuana and millions of dollars are being spent to combat it. Medical research is continuing to show a variety of benefits from the use of marijuana. I do understand the apprehension in legalizing marijuana. That same apprehension existed around alcohol.”
